Partner and customer alike: SRS Group **Qnective on successful track in Malaysia**

Zurich, 17 July 2014 - Strong breakthrough for Qnective in Malaysia: the Company recently signed a cooperation agreement with the SRS Group (www.srsgroup.my), adding a renowned partner to their Asian sales network. The Malaysian consulting company is a system integrator for Qnective's products and, at the same time, the first customer in Malaysia. SRS is also going to deploy one of the Swiss made, secure software solutions for their management team.

Partnering with the SRS Group can be viewed as a very successful first activity in the Malaysian market for Qnective. The SRS Group is a diversified global organisation managed by KSRS Sdn. Bhd. and a major player in Malaysia's ongoing economic development. The focus of the new cooperation will see SRS act as a distributor for Qnective's encryption products, especially the voice and messaging solution Qtalk. Target customers for these products are enterprises using off-the-shelf business smartphones for their employees as well as governmental organisations.

"The commitment of SRS both as an integrator and customer is a crucial first step for us in the Malaysian market. We believe in this partnership and in the market requirement for our product. We are very excited about the cooperation agreement and we are looking forward to securing the mobile communications of different Malaysian companies," says Oswald Ortiz, CEO of Qnective. The SRS Group offers consulting services in areas like retail, construction, trading and Information Technology with a very broad network of Malaysian suppliers, partners and customers. SRS was founded in 1974.

Qtalk Secure: multi device business solution for everyday use

Qtalk offers end-to-end encryption without the hassle. Easy to deploy and to maintain, the software solution is compatible with a wide range of smartphones from Android to iPhone and Blackberry as well as for Windows desktop PCs. Its tap-proof system consists of secure voice calls, secure instant messages, secure SMS and file transfer as well as secure group chats. Users of Qtalk are safe from industry espionage and protect their everyday business communications efficiently. Based on Voice-over-IP, a wide range of networks from WiFi to GSM can be used.
