

Requirement Engineer/Technical Writer

About Qnective

This is your opportunity to join one of the international leading providers of secure communication platforms and solutions for the next generation of mobile communication. Qnective offers secure communication services for governments, public safety organizations and large-scale enterprises. The company develops and maintains a Swiss made, unique proprietary encrypted platform for telephony and communication services with mobile devices.

About the role

We are looking for a **Requirement Engineer/Technical Writer** to complete a team of highly qualified professionals devoted to the design and the development of innovative secure mobile communication solutions. For this international and dynamic environment, we are looking for a strong and organized personality able to deal between various responsibilities, showing initiative, independence and high professionalism.

Responsibilities

- Participating in the whole development life cycle of Qnective's solutions
- Work collaboratively with product management, technical leads, architects and UX designers to
 - Challenge, complete and further translate business requirements into functional and non-functional requirements
 - Participate actively in the production of software design specifications
 - Ensure a common understanding between product management and R&D
 - Participate in design reviews, and other aspects of the products to ensure fulfillment of the requirements
 - Manage requirement changes and their traceability
- Leadership in the standardization of technical documentation processes

Your profile

- University degree or similar education preferably in computer science or information technology
- At least 5 years of experience in software development, including 2-3 years of practical experience in requirements engineering and/or technical writing
- Strong technical background in two or more of the following fields are required
 - Enterprise communication services (VoIP, Instant messaging)
 - Distributed system engineering and service oriented architecture
 - Cryptography, software and network security engineering
 - Mobile application development (iOS, Android and Windows)
- Strong organizational and analytical skills to aggregate, structure and track information coming from different sources, decompose high-level information into details, and build-up an abstract view from low-level technical details
- Strong interpersonal skills to critically evaluate business requirements from the underlying needs and engineering resources, and smooth conflict resolution
- Experience in software certification processes is a plus
- Ability to deliver high-quality technical documentation and meet deadlines
- Ability to take ownership and follow through to task resolution
- Structured and autonomous approach to work
- Fluent in English with strong oral and written communication skills and an open-minded personality.

What we offer

This is your chance to join a highly innovative team with experienced professionals. You will encounter a friendly atmosphere with a start-up and entrepreneur mentality. Furthermore, we offer you a permanent employment with a competitive package and the possibility to live in one of the most beautiful areas of the world. In addition, we also offer you broad possibilities to evolve in your career.

Interested? Send your application (CV, motivational letter, diplomas) to Ms. Vivienne Daescher at jobs@qnective.com with the subject line **“Requirement Engineer / Technical Writer”**.

For this role we only consider direct applications from candidates.
