

## Security Engineer

### About Qnective

This is your opportunity to join one of the international leading providers of secure communication platforms and solutions for the next generation of mobile communication. Qnective offers secure communication services for governments, public safety organizations and large-scale enterprises. The company develops and maintains a Swiss made, unique proprietary encrypted platform for telephony and communication services with mobile devices.

### About the role

We are looking for a **Security Engineer** to complete a team of highly qualified professionals devoted to the design and the development of innovative secure mobile communication solutions. For this international and dynamic environment, we are looking for a strong and organized personality able to deal between various responsibilities, showing initiative, independence and high professionalism.

### Responsibilities

- Key role in the assessment of the security in client-server applications
- Perform security code audit and research new attack vectors against Qnective products
- Conduct application level security testing against Qnective products
- Research and stay current on mobile security threats
- Work with the team to continuously develop and refine internal security processes and standards, working closely with developers on a daily basis
- Participation in mentoring and skills transfer among team members

### Your profile

- MSc degree in computer science with at least 3+ year experience in the field of information security
- Significant experience in vulnerability assessment, penetration testing, vulnerability exploitation, fuzzing, obfuscation, forensics and static code analysis
- Excellent knowledge of various aspects of system security such as Linux (server), mobile (Android, iOS, etc) platforms and other client platforms (e.g. windows)
- Programming experience in at least one scripting language (e.g. perl, python) and application programming languages e.g. C++ and Java
- Open minded personality with strong communication skills and capable of working in a multidisciplinary and multicultural team
- Ability to go into details but also think in a holistic way about the security of systems
- Fluent in English

### What we offer

This is your chance to join a highly innovative team with experienced professionals. You will encounter a friendly atmosphere with a start-up and entrepreneur mentality. Furthermore, we offer you a permanent employment with a competitive package and the possibility to live in one of the most beautiful areas of the world. In addition, we also offer you broad possibilities to evolve in your career.

Interested? Send your application (CV, motivational letter, diplomas) to Mr. Erduan Mellova at [jobs@qnective.com](mailto:jobs@qnective.com) with the subject line "**Security Engineer**".
